0-9 Generations	10-19 Generations	20-29 Generations	30-39 Generations

- Infinite allele mutation model is used
- Average mutation rate varies: 0.0020 to 0.0031
  rates derived by Doug McDonald from the Sorenson database
- Values on the diagonal indicate number of markers tested
- Probability is 50% that the TMRCA is no longer than indicated

Mutations
